Author's Index to the Sixteenth Bibliography

The Roman figures refer to centuries; the other words, as *China*, *astronomy*, etc., refer to the sections of Parts II and III bearing these titles. This index will enable one to find more easily the papers analyzed in the present bibliography, and also to see at a glance what each writer is doing.

ERRATA N° 9

(For previous errata see vol. II, 480; III, 155, 503; IV, 220, 647; V, 569; VI, 132, 251.)

Vol. III, p 328. Last note. STICKER's paper appeared in 1916 (not 1919). Last but one note. Read 1407 instead of 1402.

Vol. IV, p 32. Though my paper on *The Principle of Symmetry* was hardly more than a sketch, I am unpardonable for not having mentioned PIERRE CURIE's fundamental work on the subject (1884-1894) and the more so that I have been familiar with it since 1908. For a summary of CURIE's views see his life by his wife, p. 31-35 (*Isis* VII, 232).

p. 398. Read CARCOPINO (not CARPOCINO).

Vol. V, p. 236, 243. The note URBAIN should have been classified under XIX E.

p. 258. Read SABINE instead of SABIN.

p. 280, top. Read GIUFFRIDA-RUGGERI (not RUGGIERI).

p. 286, last note. Originated in 1222 (not 1922).

p. 458, bottom. Refer to *Isis*, VI, 213 (ROHDE).

p. 504. Note CORNARO. He died in 1465, not 1469. See PAVANELLO's edition p. 19 sq. However, the cover of that edition bears another date, 1464.

p. 551. Note GEIRINGER. l. 10. Read Stil instead of Stiel and in denen wieder instead of in denen viele.

p. 564. Note APPEL. Read APPELL.

Vol. VI, p 135. l. 7. After MACDONALD, add RAOUL M. MAY (Paris).

p. 332, l. 15. Read Miṣrî instead of MIR î.

p. 333, l. 1 of last §. Read denkbar instead of denkar

p. 410. Of course the second s in the Arabic alphabet should be dotted like the three following letters.

p. 537. Note SUDHOFF, l. 1. Read 1924, not 1923.

p. 551, footnote 2. Instead of « When RAMSAY and RAYLEIGH discovered argon independently in 1895 », read « When RAYLEIGH and RAMSAY discovered argon in 1895 ». The first steps were undoubtedly made by RAYLEIGH; RAMSAY helped to complete the discovery. See RAYLEIGH in *Nature*, 66, 512, 1892 and *Proc. R. S.*, 55, 340, 1894; RAYLEIGH and RAMSAY (note the order) in *Phil. Trans.* 186 A, 187, 1895. (N. R. C.)

p.571. Note CLAPARÈDE. In title read diagnostiquer for agnostiquer

A few other misprints are not mentioned in these errata because they are too obvious to cause any error or confusion. I wish to express my thankfulness to the readers who take the trouble to make the above-mentioned corrections in their set of *Isis*. I would advise them, after having accomplished that little task, to write their initials near mine at the bottom of this note, thus to indicate that these and the previous errata have been taken into account. G. S.

These and the previous errata have been corrected by.....

Authors' Index to the Seventeenth Bibliography

The Roman figures refer to countries; the other words, as *China, astronomy,* etc., refer to the sections of Parts II and III bearing these titles. This index will enable one to find more easily the papers analyzed in the present bibliography, and also to see at a glance what each writer is doing.

A few other misprints are not mentioned in these errata because they are too obvious to cause any error or confusion. I wish to express my thankfulness to the readers who take the trouble to make the above-mentioned corrections in their set of *Isis*. I would advise them, after having accomplished that little task, to write their initials near mine at the bottom of this note, thus to indicate that these and the previous errata have been taken into account. G. S.
